

✓ Experiment 1

Online Event Registration & Promotional Portal Using HTML5

🎯 Aim

To design and develop an **Online Event Registration & Promotional Portal** using **HTML5**, demonstrating the use of **form elements** and **media elements** such as images, audio, and video.

📝 Description

This portal:

- Displays **event details** using HTML5 media elements:
 - Event banner image
 - Promotional video
 - Background audio
 - Allows users to **register for the event** using an HTML5 form with:
 - Text, email, date inputs
 - Radio buttons
 - Select menu
 - Textarea
 - File upload
 - Demonstrates integration of **multimedia content** and **interactive forms** in HTML5.
-

□ Procedure

1. Create a new HTML file named **event.html**
2. Add the basic HTML5 structure
3. Insert:
 - Image using ``
 - Video using `<video>`
 - Audio using `<audio>`
4. Create an event registration form using various HTML5 form elements
5. Test the page in a browser
6. Validate form inputs and media playback
7. Save the file and upload it to GitHub

Result

An **Online Event Registration & Promotional Portal** was successfully developed using **HTML5**.

The webpage integrates **media elements** and **interactive form controls**, demonstrating modern web design features. The project was tested and uploaded to a GitHub repository.
